FRESHER FUTURE WITH THE SIEMA FOOD EXPO

Morocco is one of the most profitable markets for food, processing, packaging and machinery industry in the African region with its perfect location, annual growth rate, and its dependency to the international food market. Morocco is located in Northern Africa with a perfect close-range of Europe, less than 15 kilometers away from Spain. Morocco which has around 38 million populations is the 6th largest economy among the 14 Middle East and Northern Africa countries. It had a GDP of approximately 150 billion dollars in 2024.

Morocco is famous for producing wheat, sugar beet, orange, potatoes, tomatoes, olives, olive oil, fish and many other products but it is strongly dependent to foreign machinery industry to extend a variety of product lines and modernize their packaging technology. Being a multilingual country, having a stable political structure, having tax free agreements with many countries and Moroccan market's dependency on the international market made all eyes on the Moroccan market in recent years.
